WORK EXPERIENCE

Ally Bank

Mar. 2018 – Present

Senior UI Application Developer

Aliso Viejo, CA

- I'm the lead for HTML and SCSS and set the coding standards for the whole team.
- I founded developer reference guide where frontend developers get their code snippets that follow accessibility standards.
- My normal day consists of working with the designers to improve our wireframe, then building out Angular components or pages based on the wireframes.

Neudesic

Aug. 2015 – Mar. 2018

Web Developer II

Irvine, CA

- Functioned as lead web developer of product websites
- Successfully proposed and co-developed the stack that almost all sites are now running on. This stack allowed for 5x faster load times, 3x faster creation times, and resolved nearly all old bugs. The stack involves custom coded plugins/modules and themes for Wordpress, it utilizes PHP, AJAX, jQuery, and REST APIs.
- Changed the push process from live editing on production to local development on XAMPP, which then pushes to a shared Github repository, then uses deploybot to push to production.

ThomasTsai.com

Sep. 2009 – Present

Web Developer

Palos Verdes Peninsula, CA

- Built a time tracking web application with phone system (Twilio API) and geolocation. It utilizes React.JS and Meteor.JS as the stack.
- Built a website for a world-class artist whose work was featured at the Vatican's international conference on autism
- Built Wordpress themes and plugins for various clients

EDUCATION

California State Polytechnic University Pomona

Aug. 2015

B.S. in Computer Information Systems

Pomona, CA

- Coursework included Object-Oriented Programming, Interactive & Responsive Web Development, and much more. I was the leader for my senior project group. We helped an outside company, Neudesic, perform a website migration to a different platform. They liked me so much that they hired me.
